JELLA TOLENTINO

Makati City, Philippines | jelladivinatolentino@gmail.com | 09557903363

PERSONAL INFORMATION

I am a highly proficient programmer with a high degree of knowledge in front-end / back-end development, quick learner, foodie, explorer and aspiring artist. I am currently taking up Masters in Information Systems from University of the Philippine's Open University. I am an expert in PHP, Jquery and Javascript and advanced knowledge in CSS and HTML. I am very fond with design and animation as well. Optimizing and debugging codes are one of the best things I do when it comes to programming due to the fact that I want everything to be well-organized. I also love spending time fixing every little detail of the program. I like to work with a team, because I believe that team work makes you do things faster and you'll learn from each other. I have way too many interest to name, but one of the things I want is to explore more of my creative side and make use of my imagination which might help me in my chosen field as well as my other interests in life. I work hard for things that to me are worth it and adds value to me, and I want to be surrounded by positive people.

Portfolio: jelladivinatolentino.github.io

SKILLS

PHP | HTML | CSS | jQuery | Javascript | Photoshop
